
CONTENT

| | |
|--|----------|
| <i>V. Bondarenko, V. Cherniak, F. Cawood, V. Chervatiuk</i> Technological safety of sustainable development of coal enterprises | 1 – 11 |
| <i>Yu. Voitenko, V. Kravets, A. Shukurov, O. Drachuk</i> Peculiarities of brittle and ductile materials destruction and deformation during the explosion of industrial shaped charges | 12 – 20 |
| <i>O. Krukovskyi, V. Krukovska, Yu. Vynohradov</i> Mathematical modeling of unsteady water filtration into anchored mine opening | 21 – 27 |
| <i>M. Kharchenko, A. Manhura, S. Manhura, I. Lartseva</i> Analysis of magnetic treatment of production fluid with high content of asphalt-resin-paraffin deposits | 28 – 33 |
| <i>V. Tymoshchuk, Ye. Sherstiuk, Z. Niedbalski, T. Morozova</i> Modeling the drainage facilities operation at the prospective construction site on the Dnipro floodland | 34 – 40 |
| <i>E. Feldman, N. Kalugina, O. Chesnokova</i> Evolution of cracks in selvedge of the coal bed during its stationary working | 41 – 45 |
| <i>Sh. Zairov, M. Ravshanova, Sh. Karimov</i> Scientific and technical fundamentals for explosive destruction of the mass composed of rocks with different hardness | 46 – 51 |
| <i>M. Pedchenko, L. Pedchenko</i> Analysis of gas hydrate deposits development by applying elements of hydraulic borehole mining technology | 52 – 58 |
| <i>O. Khomenko, M. Kononenko, I. Myronova</i> Ecological and technological aspects of iron-ore underground mining | 59 – 67 |
| <i>V. Golik, V. Komashchenko, V. Morkun, O. Burdzieva</i> Experience of metal deposits combined development for South African enterprises | 68 – 78 |
| <i>V. Griniyov, L. Zakharova, I. Diedich, V. Nazymko</i> Distant interaction of rock mass clusters around underground opening | 79 – 83 |
| <i>A. Dreus, K. Lysenko, A. Kozhevnykov, B. Liu</i> Modeling hydrodynamics of the flushing fluid intermittent flow in the hydraulic system of the diamond bit | 84 – 90 |
| <i>M. Filatiev</i> Effect of rocks displacement activation on the formation of the surface trough during anthracite seams extraction | 91 – 95 |
| <i>V. Samusia, V. Kyrychenko, Ye. Kyrychenko, S. Ilina, A. Antonenko</i> Hydro-thermodynamic model of deep-water hydraulic lift of 3-phase fluid considering heat-mass-exchange processes | 96 – 102 |
