
CONTENT

<i>M. Toderas, R. Moraru</i> The effect of increasing the water content on rocks characteristics from Şuior, Romania	1 – 14
<i>V. Biletskyi, S. Landar, Yu. Mishchuk</i> Modeling of the power section of downhole screw motors	15 – 22
<i>K. Hanushevych, V. Srivastava</i> Coalbed methane: places of origin, perspectives of extraction, alternative methods of transportation with the use of gas hydrate and nanotechnologies	23 – 33
<i>B. Ekvist</i> Optimization of blasting works during the destruction of masses with complex structure	34 – 39
<i>V. Sobolev, D. Rudakov, L. Stefanovych, K. Jach</i> Physical and mathematical modelling of the conditions of coal and gas outbursts	40 – 49
<i>A. Zhabin, A. Polyakov, E. Averin</i> Scale factors for conversion of forces on disc cutters for the main domestic and foreign methods	50 – 55
<i>A. Olovyanny</i> Gravitational and tectonic stresses in the rock mass and their determination by measurements in separate points	56 – 69
<i>B. Sobko, C. Drebenstedt, O. Lozhnikov</i> Selection of environmentally safe open-pit technology for mining water-bearing deposits	70 – 75
<i>O. Kulikovska, V. Sydorenko</i> Research into the influence of technical factors on rocks deformation during reworking of ore deposits	76 – 83
<i>V. Krasnyk</i> Modeling the process of mineral rocks cutting with a tool made of polycrystalline superhard materials	84 – 92
<i>F. Banzi, P. Msaki, N. Mohammed</i> Assessment of radioactivity of ^{226}Ra , ^{232}Th and ^{40}K in sSoil and plants for estimation of transfer factors and effective dose around Mkuju River Project, Tanzania	93 – 100
<i>S. Podkopaiev, I. Iordanov, D. Chepiha</i> Stability of the coal seam roof during the sudden collapse of lateral rocks	101 – 110
<i>Ye. Koroviaka, T. Lubenets</i> Substantiation of the method for constructing the diagram of the horizontal belt conveyor tightness	111 – 116
<i>H. Haiko, L. Pyha</i> Shielded development of bottom gas hydrates	117 – 123
