## CONTENT

<i>B. Guo, H. Dong, L. Wang</i> Experimental studies on the shear resistance of original coal-shale joint	1 – 10
<i>A. Glebov</i> Selection of gathering autotransport for the systems of cyclical-and-continious technology	11 – 18
<i>V. Biletskyi, P. Molchanov, V. Orlovskyy, L. Shpylovyi</i> Research into the mechanism of aggregate-forming objects contact with oil aggregation of finely-dispersed coal	19 – 28
<i>R. Basu</i> Evaluation of some renewable energy technologies	29 – 37
<i>K. Zabolotnyi, O. Zhupiiiev, A. Molodchenko</i> Development of a model of contact shoe brake-drum interaction in the context of a mine hoisting machine	38 – 45
<i>L. Gushchina, E. Naumov</i> Physical and chemical conditions for the formation of mercuric gold within Au-Hg deposits (thermodynamic modeling)	46 – 58
<i>M. Zarubin, L. Statsenko, V. Zarubina, E. Fionin</i> Developing information systems of operation schedules to stabilize the grade of a mineral	59 – 70
<i>O. Sinchuk, I. Sinchuk, I. Peresunko, V. Stepanenko</i> Formation of integrated energy efficiency indicator for mining industry companies	71 – 78
<i>A. Asanov, B. Mekenbaev, D. Chalybekov, J. Arziev</i> Study of the process of coal transfer by means of auger effector within the aggregate of boiling bed	79 – 85
<i>O. Khomenko, L. Tsendjav, M. Kononenko, B. Janchiv</i> Nuclear-and-fuel power industry of Ukraine: production, science, education	86 – 95
<i>A. Syrotyuk, O. Vytyaz, J. Ziaja</i> Damage to flexible pipes of coiled tubing equipment due to corrosion and fatigue: methods and approaches for evaluation	96 – 103
<i>M. Lubenets</i> Friction of flexible friction effect and general law on friction in operation of transport machines with flexible tie body	104 – 110
<i>M. Filatiev, A. Laguta</i> Experimental determination of angle values of the rocks full displacement when undermining them by breakage headings	111 – 116
<i>E. Slyuta</i> Problems of research and mining of gas deposits on the Moon	117 – 125
